

## Right & Left Side Lineal Brush Sander

**Salida®**

Mpdel no.	SL- 300-6H
Max. working width	12" (300mm)
Max. working height	12" (300mm)
Min. Work-pieces length ( Continuous feeding, one by one)	15" (380mm)
Min. Work-pieces length (Single wood picee feeding)	800mm
Min. Work-pieces thickness	3/8" (9.5mm)
Feed speed adjustment by VFD (inverter)	2– 12 m/min
Speed of Sanding Wheel	200-1200 RPM
Righ Side brushi head motor	3x 3HP (2 x 2.2KW)
Left Side brushi head motor	3x 3HP (2 x 2.2KW)
Left & Right Head Length	300mm
Conveyor motor	1/2 HP (0.37KW)

## FEATURES OF THE MACHINE

This machine can be used for sanding or denibbing rails, architraves, skirtings and straight profiles. Different abrasives, speed and pressures can be used for a wide variety of applications or materials.

The main frame is fabricated of heavy steel plate and ribbed to minimize vibration and deflection.

All operating controls are centralized in a convenient control panel.

It can be used to sand architrave and molding for 3 sides brushing head the speed ,adjust by inverter

**All the sanding heads adjust separately upward , downward,forward,backward.**
