

SL-MT13

Table type manual Deburring machine

Dry Metal Deburring Sander

Product Features

The manual grinder is a multifunctional starter model and the best cost-saving choice. The machine is suitable for various finishing operations on metal parts such as deburring, edge rounding, finishing, laser oxide removal and heavy slag removal. Also, mirror finish can be created if required. With the 180 degrees rotating shaft, it's quick and easy to switch between different consumables.

SL - MT-13

Specification

Model	SL-MT-13
Working height	920 mm
Work surface	1300 x 800 mm
Vacuum zone	350 x 250 mm
